If you want to push back I'm good on either the 31st of Sep 1 – would prefer the 31st, but either works.

Chris,

Let's talk. I may have Sam Porter available as a team lead. I am not sure I want to postpone this event very long since we are now out of cubitainers.

I'm being deployed!

Most likely we'll work on this when I return.

I'm heading to New Mexico to collect samples for the Spill which occurred on the Animas River.
